

Expanding Our Partner Network Worldwide!

We have expanded our partner network by tying up with top Electronics & Electro-mechanical component manufacturers from different corners of the world. Now it's even easier for our customers to find electronic components at their doorstep.

Our New Partners Are

Advanced Interconnections is a leading designer & manufacturer of technologically advanced interconnect solutions. Its product line includes BGA socketing systems, IC sockets & adapters, board to board connectors and the world's first removable terminal carrier, peel-a-way.

With two manufacturing units in Switzerland and the US, Microprecision Electronics SA specialises in customized precision electro-mechanical components ranging from microswitches, limit switches, LED Indicator lights, metal foil resistors & mechanical sensors.

ARS is a worldwide independent distributor of electronics & electro-mechanical components catering to the Military/ Defense, Aerospace & Railway industries. It produces Mil standard hermetically sealed relays, timers & sensors, switches & semiconductors. ARS is source for hard to find & obsolete parts.

Scolmore is a leader in the electrical accessory market in UK. Starting from basic functional moulded switches to sophisticated wiring solutions, its offering includes a complete range of wiring accessories. Scolmore's IEC Lock offerings range from Lock + rewirable connectors, Outlets & Moulded Locking connectors.

Switzerland's Deltron specializes in production of small to medium quantities of high-quality connectors with a wide & deep range of D-sub connectors, accessories such as connector hoods & high quality contacts. It offers connectors in various versions of high density, dual port, combination & filter connectors which are also available in press fit, SMT & waterproof up to IP68.

Italy-based UTK component is an active designer & manufacturer of standard inductive components. Its product family includes pulse transformers, switching transformers, power transformers, pilot transformers, current sense transformers, Switching inductors, drive transformers, mode transformers, custom designed inductive components, high & low power switches etc.

Farsens is an active provider of sensors in Asia, North America, Central America, South America, Europe, Africa, Australia & Oceania. It offers proprietary RFID ICs that are able to supply and communicate with external components.

Based in Germany, Fischer is a leading manufacturer of high-quality mechanical electronic components such as heat sinks, cooling system for semiconductors, housings thermally conductive material, cases & connectors etc.

Netsol is a South Korean fabless memory semiconductor design house. Established in 2010, it develops and sells high speed, low latency, low power consuming memory products. Netsol's current products are Async Fast SRAM, Low Power SRAM, Sync SRAM, Quadruple/DDR SRAM and SLC NAND Flash.
